

NOTICE TO FREQUENCY SPECTRUM LICENSEES

New Security Features for ICASA Licence Certificates

This Notice serves to alert all frequency spectrum licensees of the new security features that the Authority has introduced into the design for Frequency Spectrum Licence/Radio Dealers Certificates, Type Approval Certificates and ICASA Inspector Cards.

The new security features are being introduced following reports of fraud and impersonations that were brought to the attention of the Authority and reported to the South African Police Service. Criminal prosecutions were pursued and a number of suspects were convicted as a result.

Frequency Spectrum Licence/Radio Dealers Certificates display the following security features: ● ICASA Logo with a silver in-lay on top left corner ● Silver hologram on top right corner ● Embossed ICASA acronym at bottom left corner.

Type Approval Certificates (Telecommunications or Radio Equipment) display the following security features: ● ICASA Logo with silver in-lay, centred at the top of the certificate ● Silver hologram on top right corner ● Embossed ICASA acronym at bottom left corner.

Inspector Cards

All ICASA Inspectors carry identity cards that outline their responsibilities as per the ICASA Act of 2005, displaying the following features: Front Side: ● ICASA Logo without in-lay ● Name of Inspector and ID number ● Passport photo of Inspector. Back Side: ● Name of Inspector and Employee Number ● Powers of Inspector as provided for in the ICASA Act ● Hologram on left side of the card ● Signature of the Chairperson of ICASA.

Details of these security features can be downloaded from the ICASA website - www.icasa.org.za
